DEFINITIONS

Background artist is not required to give individual characterisation nor to speak any word or line of dialogue except that background speech or noise shall not be deemed to be dialogue in this context. A background artist is a person or member of a group contributing to the overall authenticity and atmosphere of a scene. The individual or individuals in the group may be dressed in clothing identifiable with the role, calling or trade selected for each by the producer or advertiser, and may be directed by the director to move and/or react as required on the set. Crowd noises can include community singing of well known songs where words do not have to be learned.

Walk-on artist is an identifiable non-speaking artist, except that background speech or noise shall not be deemed to be speaking in this context, who shall be required to act individually in medium shot, or more closely, a special function peculiar only to the role, trade or calling that the character is supposed to portray and/or who, at the same time that his/her movements are recorded, is subject to individual direction and has a direct relationship with an actor (ie visual Featured Artist) who is performing his/her part as directed.

MINIMUM RATES AND OTHER PAYMENTS

Please contact the Equity office for details of current minimum rates and other payments.

Holiday Pay

Following a ruling by the European Court of Justice in June 2001, under UK legislation freelance workers and those on short-term employment contracts are entitled to paid annual leave from the first day of their employment. If the employment ends during the first 13 weeks, the employee will be able to claim for leave that has been accrued but not taken during this period.

Artists are entitled to 5.6 weeks paid holiday on a pro rata basis per year from the first day of their engagement.

For walk-on and supporting artists who are usually engaged on short term contracts an amount for untaken holiday will be paid in addition to the daily fee. This is calculated as one-twelfth of the daily rate:
